Ransomware Attacks: How to beat them!

Kashif Raza hosts a short discussion about the biggest cybersecurity threat faced by organizations everywhere. Learn from our experts, how you can beat this threat head-on with game changing technology and inexpensive cybersecurity measures.

Proactive vs Reactive IT Support

Reactive IT support model allows organizations to buy a block of hours, and consume it on a needed basis. It seems cheap, so in this blog, we discuss the difference between Proactive and Reactive IT Support Models.
